Introduction to Artificial Intelligence

Written HW2

- **Due:** Tuesday 9/17 at 11:59pm.
- Policy: Can be solved in groups (acknowledge collaborators) but must be submitted individually.
- Make sure to show all your work and justify your answers.
- Note: This is a typical exam-level question. On the exam, you would be under time pressure, and have to complete this question on your own. We strongly encourage you to first try this on your own to help you understand where you currently stand. Then feel free to have some discussion about the question with other students and/or staff, before independently writing up your solution.
- Note: Leave the self-assessment sections blank for the original submission of your homework. After the homework deadline passes, we will release the solutions. At that time, you will review the solutions, self-assess your initial response, and complete the self-assessment sections below. The deadline for the self-assessment is 1 week after the original submission deadline.
- Your submission on Gradescope should be a PDF that matches this template. Each page of the PDF should align with the corresponding page of the template (page 1 has name/collaborators, question begins on page 2.). **Do not reorder, split, combine, or add extra pages**. The intention is that you print out the template, write on the page in pen/pencil, and then scan or take pictures of the pages to make your submission. You may also fill out this template digitally (e.g. using a tablet.)

First name	rudman
Last name	Mao
SID	3040807955
Collaborators	Kuennei Lang

Q1. [20 pts] Secret Santa

The CS 188 staff members are doing Secret Santa for the holidays! Each staff member brings a gift to the table, intending for a different person to receive that gift. However, past TA Aidan is upset that he was not invited to participate, so he removes all the name cards on each gift so that none of the staff members know whose gift is whose!

The gifts are: Abacus (A), Backgammon (B), Chess (C), Dinosaur toy (D), Easter egg (E), Flying drone (F) and Gameboy (G). The participants are: Angela, Danial, Jonathan, Regina, Ryan, Saathvik, Yanlai Angela and Regina are juniors and everybody else is a senior.

While the staff members have forgotten which gift is for who, Aidan has left them some clues.

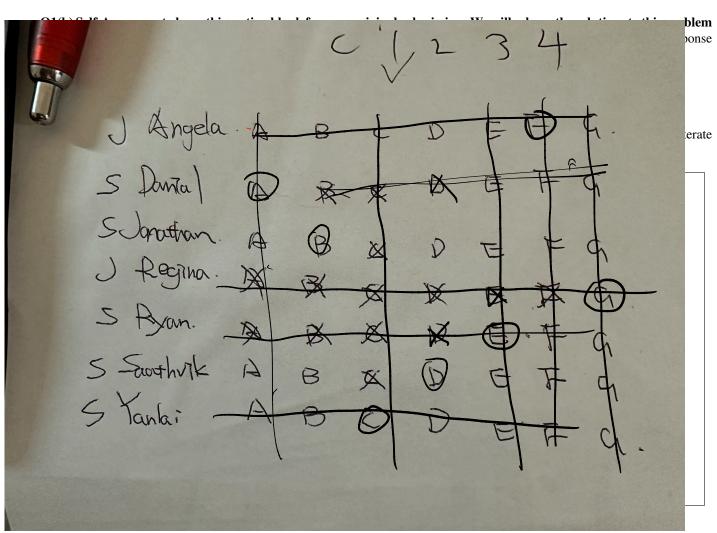

- 1. Each person should receive exactly one gift.
- 2. Any person whose name starts with R (Ryan, Regina) should not receive the abacus.
- 3. The Easter egg and Flying drone are for people of different grades.
- 4. The Flying drone and the Gameboy are for people of the same grade.
- 5. Any person whose name ends with a consonant (Danial, Jonathan, Ryan, Saathvik) should not receive the Chess set.

3.	Any	person	whose na	ine ends with a	Consonan	it (Daniai,	Jonathan	, Kyan, Sa	iatiivik) s	nould no	receive in	e Chess set.
We fra	ıme t	his prol	blem as a	CSP, with the v	variable b	eing a per	son, and the	he domair	n being th	e item th	ney receive.	
(a)	(i)	ments the var	alphabeti riables are	cally (i.e. assig	n the i th p his assign	person in a	alphabetic	al order to	the i th g	ift in alp	habetical o	alize the assign- rder). Which of
		□ A	ngela 🗌	Danial D Jo	onathan [Regina	Rya	n 🔽 Saa	athvik [Yanlai	O Nobo	dy
	(ii)			of the first clue imum number o								of two variables.
		\bigcirc 0	\bigcirc 1	2 0 3 0	4 🔾	5						
	(iii)			randomly choos ch of the people								o decide who to vith?
		□ A	ngela 🗌	Danial Da	onathan \	Regina	Rya	n 🔲 Saa	athvik [Yanlai	O Nobo	dy
Q1(a) after t							\ \\ \\	, 2	3	4		problem response
by che			J	Angela	· A	B	C	٥	E	K	X .	
If you the so			5	Danta	A	R	×	D	E	F	9	re-iterate

			5 -	authvik	4	B	X	Q	E	F	9	
			54	anla;	A	B	C	D	E	F	α.	

Now Aidan gives a few more clues:

B6{1,3,6,7}

- 6. One of Angela, Jonathan, Saathvik, or Yanlai should get Backgammon.
- 7. The person who should get Backgammon and the person who should get the Dinosaur have names with the same number of letters () 2 4 1 (> 6)
- 8. Regina's name contains the letter of the gift she should receive (i.e. A, E, or G).
- (b) The TAs restart with all the variables unassigned, then enforce all unary constraints and perform arc consistency.
 - (i) [1 pt] Do we have enough information to fully deduce the value of any of the variables?
 - O Yes No
 - (ii) [1 pt] How many values are left in Ryan's domain?
 - \bigcirc 1 \bigcirc 2 \bigcirc 3 \bigcirc 4 \bigcirc 5 \bigcirc 6 \bigcirc 7
 - (iii) [2 pts] Using the MRV heuristic, which variable(s) could be assigned next? Select multiple if there's a tie.
 - ☐ Angela ☐ Danial ☐ Jonathan ☐ Regina ☐ Ryan ☐ Saathvik ☐ Yanlai Nobody How many values are in their domain?
 - (iv) [1 pt] Breaking ties alphabetically, we assign the first MRV variable then enforce arc consistency. Now, how many values are left in Angela's Domain?
 - \bigcirc 1 \bigcirc 2 \bigcirc 3 \bigcirc 4 \blacksquare 5 \bigcirc 6 \bigcirc 7

Aidan now gives one last clue:

9. The	Easter egg should go to a TA whose grade is a senior.
	want to use this information to solve our CSP. t: We may have to backtrack assignments from a previous part.
(i)	[1 pt] Do we have enough information to fully deduce the value of any of the variables?
	Yes No
(ii	[7 pts] Complete a full recursive backtracking search and identify a satisfying assignment. Apply the MRV heuristic when needed and break any ties alphabetically. Which gift does each person get?
	Angela: ○ A ○ B ○ C ○ D ○ E ♣ F ○ G Danial: ○ A ○ B ○ C ○ D ○ E ○ F ○ G Jonathan: ○ A ○ B ○ C ○ D ○ E ○ F ○ G Regina: ○ A ○ B ○ C ○ D ○ E ○ F ○ G Ryan: ○ A ○ B ○ C ○ D ○ E ○ F ○ G Saathvik: ○ A ○ B ○ C ○ D ○ E ○ F ○ G Yanlai: ○ A ○ B ○ C ○ D ○ E ○ F ○ G
(iii)	[1 pt] Which variable is assigned last in the backtracking search?
	○ Angela ○ Danial ○ Jonathan ○ Regina ○ Ryan ○ Saathvik ○ Yanlai
after the oby checking the objection of	f-Assessment - leave this section blank for your original submission. We will release the solutions to this problem deadline for this assignment has passed. After reviewing the solutions for this problem, assess your initial response one of the following options: I fully solved the problem correctly, including fully correct logic and sufficient work (if applicable). I got part or all of the question incorrect. Sected the second option, explain the mistake(s) you made and why your initial reasoning was incorrect (do not re-iterate on. Instead, reflect on the errors in your original submission). Approximately 2-3 sentences.
me solutio	on. Instead, reflect on the errors in your original submission). Approximately 2-3 sentences.
